

Product	Chem. Description	Features and Benefits
TYZOR® BTP	n-Butylpolytitanate	Can act as inorganic binder alone or in combination with other metal oxide for mineral filled systems providing high temperature resistance. Low VOC content.
TYZOR® TnBT	Tetra-n-Butyltitanate	Very useful binder and adhesion promoter or cross-linker for OH-functional polymers, 100% active. Miscible in most organic solvents.
TYZOR® AA-105	Titanium Acetylacetonate	Excellent as crosslinking agent for OH- functional polymers or binders, to promote adhesion or act as binder itself. Miscible in most organic solvents. Solvent free, 100% active.
