LEHVOSS
Group

Your Needs.
Our Challenge.

Alkaline solutions for exhaust gas cleaning

Our alkali products have been developed for flue gas desulphurization, focusing on marine scrubber systems. The content of Sulphur in exhaust gas has been lowered by the IMO regulation, effective as of January 1st, 2020. Our cooperation with leading scrubber producers result in a unique and new developed product range of alkali products which are approved and successfully used on board of various vessels since the early installation of scrubber systems.

Our mission is not only to supply suitable raw materials in order to comply to the latest regulations but also to provide logistic solutions like customized packing, storage and on time supply to worldwide locations. Depending on your requirements and preferences, the LEHVOSS Group can supply a unique product range consisting of suspensions, powders and flakes.

We create high-quality, reliable and long-term solutions for your raw material demands

Chemical and mineral specialities are our driving forces. The LEHVOSS Group is committed to providing the best possible solution. Our focus is on innovative products and services for individual customer requirements in order to be a reliable and predictable partner. Our core competencies are comprehensive experience, professional consulting and all-embracing achievements to ensure a trusting and long-term cooperation. Active on the markets worldwide, the LEHVOSS Group consistently lives the appreciative culture of a family business.

Because we love what we do: **We LuV it.** Since 1894.

Products and Services

LUVOMAG®		
Products	Description	Application
